Skill Highlights

- Web Scraping, Rest API's, SQL, Linux
- Django, Django Rest Framework, AWS
- Git, Jira, Confluence, LucidChart, BitBucket, SVN

Known Technologies

- Python, Django
- Django Rest Framework (DRF), React JS

More About Me

Languages

English - *Professional proficiency*
Hindi - *Professional proficiency*
Marathi - *Professional proficiency*
Kannada – *Vocal*

Address:

S. No 139/5, Simar Residency,
Flat No. 501, Near Baba Moni
Aashram, Akurdi, Chinchwad –
411033, Maharashtra

DOB:

11 Jan 1996

Sex:

Male

Others

Hobbies - *Reading novels,
Gaming, Cooking, Travelling*

Location – *Pune, India*

Summary

I am software engineer with 5 years of experience in Python scripting, web development scraping, REST API & automation. With strong analytical and communication skills, I am involved in requirement gathering, performing impact analysis along with designing and development of the project.

Experience – 5 years

Qualys - Feb 2021 - till date

Senior Software Engineer

Designed, developed, and deployed multiple applications completely from scratch using Python, Oracle, SVN, Git and Jira in microservice architecture to have minimal-to-no manual dependency with faster and more uniform output.

- Developed web application using **Django, DRF, ReactJS and Oracle** stack.
- Configured SSL certificate for HTTPS support and deployed web application on Nginx and Gunicorn servers.
- **Web scraping** using BeautifulSoup, parsing JSON, XML and Oval files.
- Schedule cron jobs to perform jobs, generate mails and logs to the developers.
- Perform SVN and Jira operations through developed framework to reduce redundancy and conflicts.
- Configure, build, and deploy applications in test and production environment on **Linux servers**.
- Document preparation (release notes, architecture design, workflow design) using **Qwiki, LucidChart**.
- Introduced multiprocessing leading to reduction in execution time by 5x.

Birlasoft Limited - November 2018 - Feb 2021 Consultant

- Resume parser to extract useful information from resume and job description to match candidate against the job openings available/applied according to appropriate skills on file upload.
- Design database models and writing stored procedures.
- Developing **backend for web application**.
- User authentication using **DRF and JWT**.
- Generating PDF and docx with dynamic content.
- **Django ORM queries**, integrating backend and frontend.
- Presenting demo of the developed model to client and working on the constructive feedback obtained.
- Integrating developed modules with the existing system, perform impact analysis on existing system.
- Tracked and resolved tickets for defects on bug reporting tool.

Education

Bachelor of Engineering

Pune University

Computer Engineering

08/2015 – 06/2018

Grade - First class with Distinction

DIY Projects

- Automatic testing of web application using Selenium Web driver
- Snake, Space Invaders game using Pygame library.
- Real time whether detection using Django framework.

ACHIEVEMENTS

Star Shining award for implementing automation in the modules.
